

A COLLEGE MAJOR

You can prepare for a successful college experience by aligning your talents, goals and interests with thoughtful consideration of majors and career prospects.

1. Consider your interests.

Identify academic interests and a discipline that interests you. Consider the career paths that interest you and the associated majors.

2. Consider your abilities.

Evaluate your abilities and aptitudes. Take a career assessment and determine if you are interested in the major. Consider the academic requirements for the major and the associated career paths.

3. It's OK to change.

Keep in mind that it is acceptable to change your major. Discuss your options with your advisor and decide if you are confident in your choice.

Take a career test to see if you are interested in the major. Consider the associated career paths.

4. Talk to a career advisor.

Evaluate the major's educational requirements and the associated career paths. Research the major's educational requirements and the associated career paths.

5. Your advisor can help.

Evaluate the major's educational requirements and the associated career paths. Research the major's educational requirements and the associated career paths.
